12. Special examinations when indicated or other noteworthy conditions: *Head Measurements*

<i>height</i>	<i>53 cm</i>
<i>w.</i>	<i>14 cm</i>
<i>h.</i>	<i>18 cm</i>

13. SUMMARY (of all abnormal findings):

This 12-3 old boy is well developed and unremarkable for his age. He has large palatal big tonsils and has not been too much cooperative during the examination. He does not laugh at all, but was humming at examination. He has no speech, and not toilet trained and likes to be alone. He is withdrawn, but does not seem to be any problem in spite of it that he is without any medication.

Date *December 9th 1973*
Form 105 (25M-67-636)
