Dear Mr. [REDACTED]

I am writing to find out if it is possible for my daughter [REDACTED] to go home with my son and his wife for Easter. She wrote and said she could and I was wondering if it is okay. My son is very good for her and she will not get into trouble with him watching her. He & I will have her back by the time she is to go. I am sure if she got away for a few days it would not be so hard to handle when she is back to you. She has never been out of the Hospital since any of the family, when they go down since she has been in there and she misses going places there. After all 5 to 6 years is a long time not to be with your own family outside the hospital. It has been that long and when we go to see her she always talks about being able to go home for holidays with her family if it is possible. I would be very grateful to you if she could go with my son. His name is [REDACTED] his address is in your book. He was down to see her about 2 weeks ago. Please let her go with him so she is not so far from home.
