4. Comments:

has received spiritual and religious care while living at HRC. He was baptized into the Roman Catholic Church about eight years ago. He has been part of a worshipping community through his area worship service for over 10 years. His involvement with chaplaincy has benefited him relationally.

* I would recommend that have the opportunity to continue to part of a worshipping community. If this can be in the context of a Roman Catholic faith community that would be ideal. This cannot but increase quality of life!

The author of this report is both willing and able to assist in connecting to a Roman Catholic Church in his new community. I would request the receiving agency do contact for assistance in connecting to a faith community.
